- Plastic canvas (7-count or 10-count)
- Yarn (worsted weight or medium weight)
- Yarn needle
- Scissors

- Glue (optional)
- Picture frames (optional)

Step-by-Step Instructions

Step 1: Create the Base

Begin by cutting a piece of plastic canvas to the desired size of your picture frame. The size of the canvas will depend on the size of the picture you want to frame. For a standard 8x10 photo, you will need a piece of canvas that is approximately 12x14 inches.

Step 2: Border the Canvas

Next, you will need to border the canvas with yarn. This will give the frame a finished look and help to hold the picture in place. To border the canvas, simply sew a running stitch around the edge of the canvas, leaving about 1/4 inch of space between each stitch.

Step 3: Create the Frame

Now it's time to create the frame. To do this, you will need to sew a series of rows of yarn around the edge of the canvas. The number of rows you sew will depend on the desired thickness of your frame. For a thin frame, you may only need to sew two or three rows. For a thicker frame, you may need to sew five or six rows.

Step 4: Decorate the Frame

Once you have created the frame, you can decorate it to your liking. You can use yarn to sew on beads, ribbons, or other embellishments. You can also use paint or markers to add designs to the frame. Be creative and have fun with it!

Step 5: Insert the Picture

Once you have finished decorating the frame, it's time to insert the picture. To do this, simply place the picture in the center of the frame and secure it with glue or tape. You can also use a piece of cardstock or foam board to back the picture, which will help to keep it in place.

Tips and Tricks

- Use a variety of colors of yarn to create a unique and eye-catching frame.
- Experiment with different stitches to create different textures and patterns on the frame.
